1. Buka virtual box kalian. Bila belum punya download terlebih dahulu di berbagai situs web yang

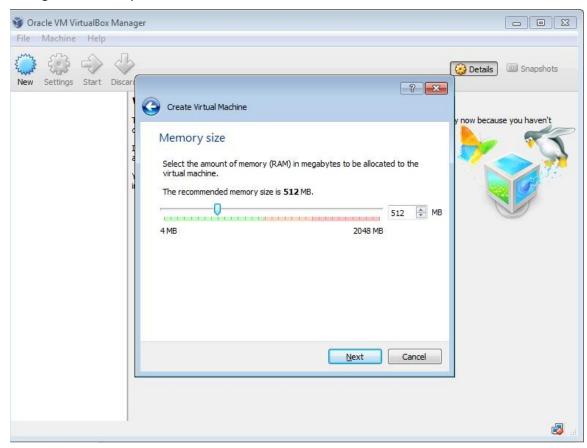

ada.

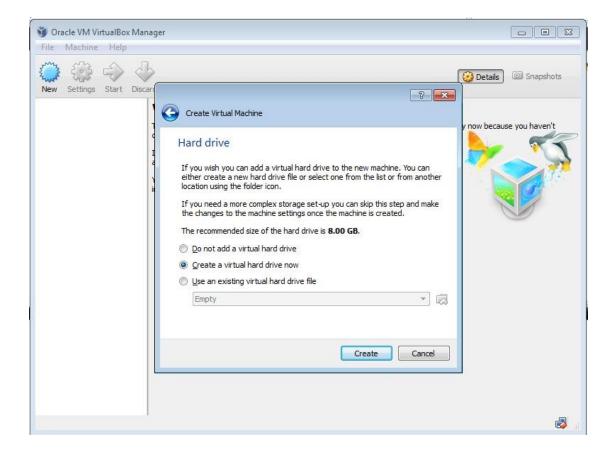

2. Klik new. Lalu pilih os apa yang kalian inginkan, disini saya memilih linux Ubuntu. Lalu klik next.

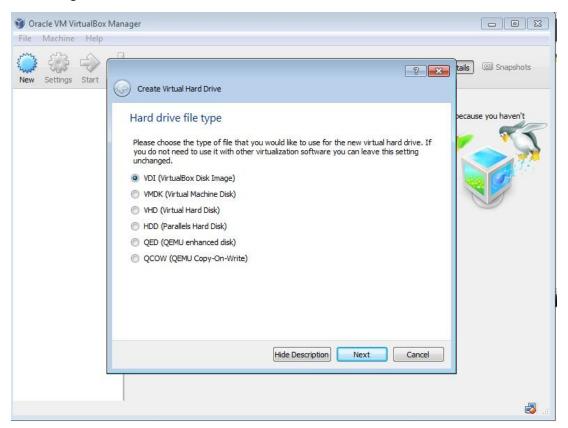

3. Sekrang aturan ram nya, lalu klik next.

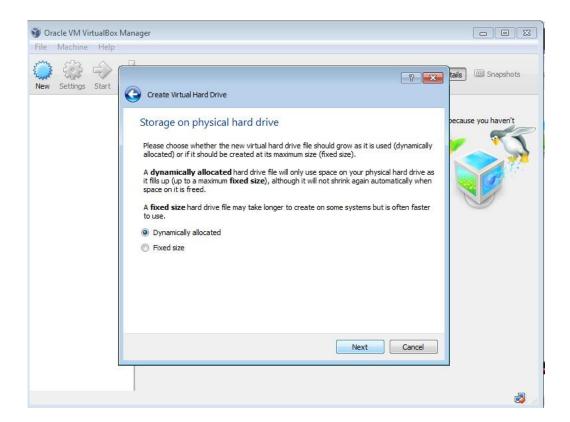

4. Pilih sesuai gambar lalu klik create.

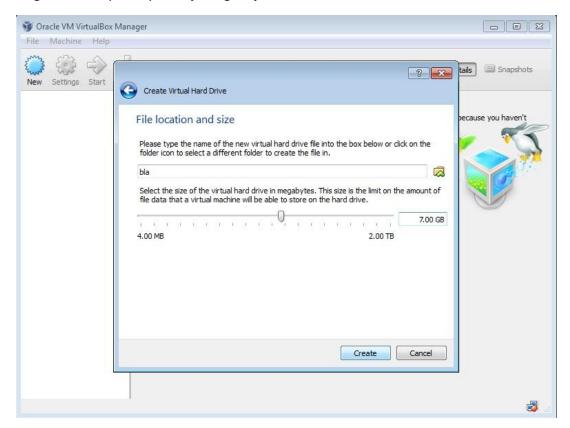

5. Pilih sesuai gambar lalu klik next.

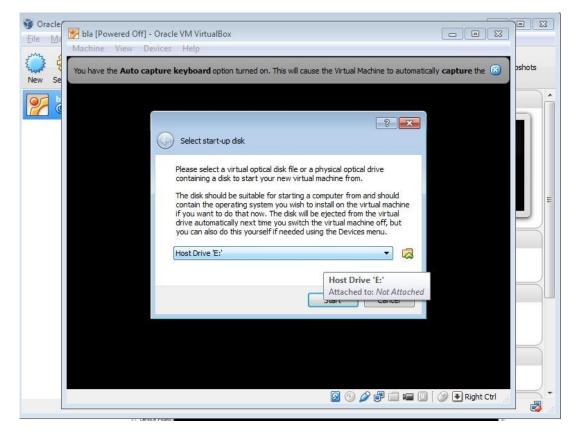

6. Pilih sesuai gambar lalu klik next.

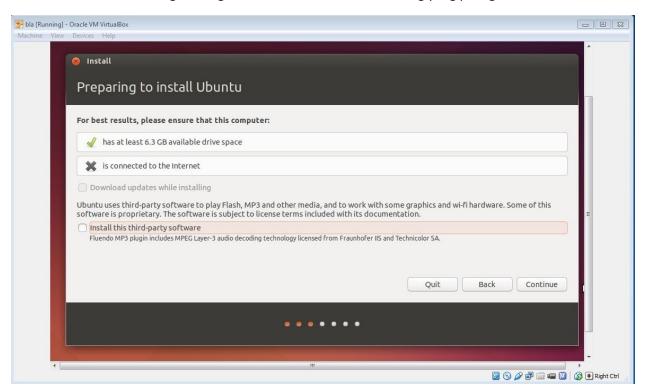

7. Sekarang atur hard space nya menjadi 7gb saja. Lalu klik create

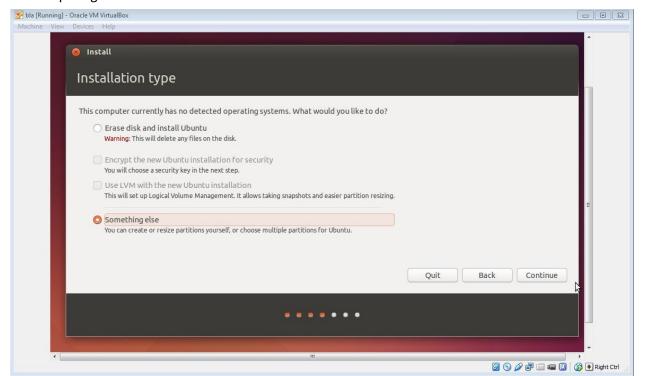

8. Sekarang cari folder/file iso Ubuntu kalian, lalu klik start.

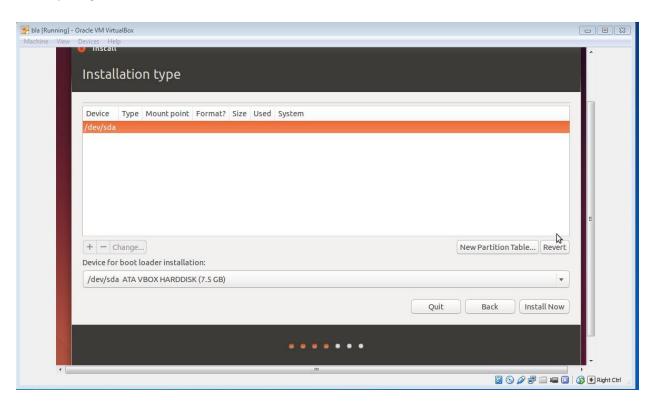

9. Klik continue. Bila kalian ingin menginstal 3 software bawaan centang yang paling bawah.

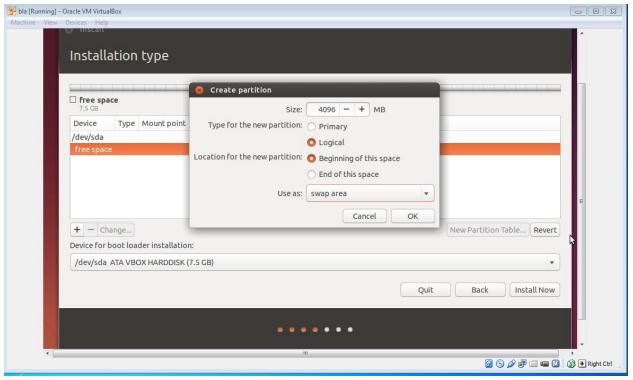

10. Pilih seperti gambar lalu klik continue.

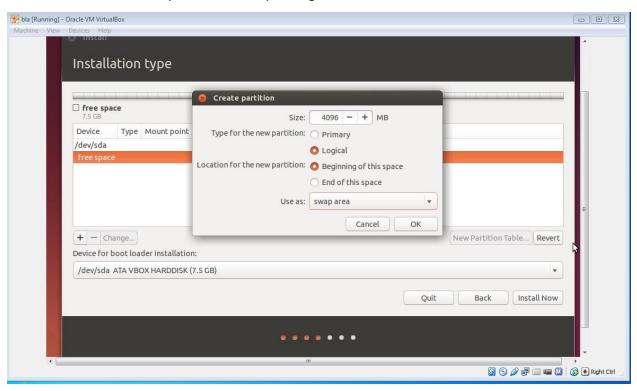

11. Setelah sudah seperti ini klik new partition table, kemudian select free space klik tanda plus lalu atur seperti g

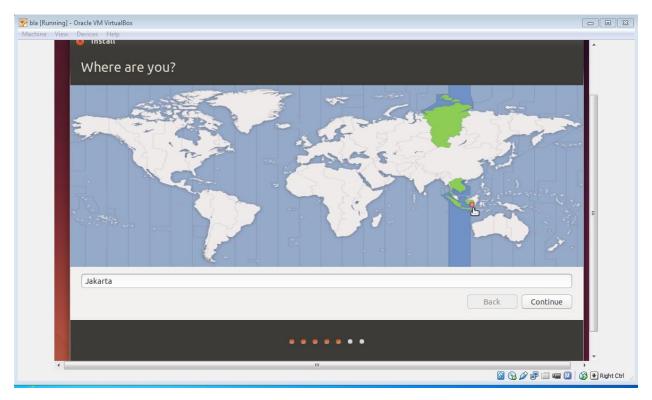

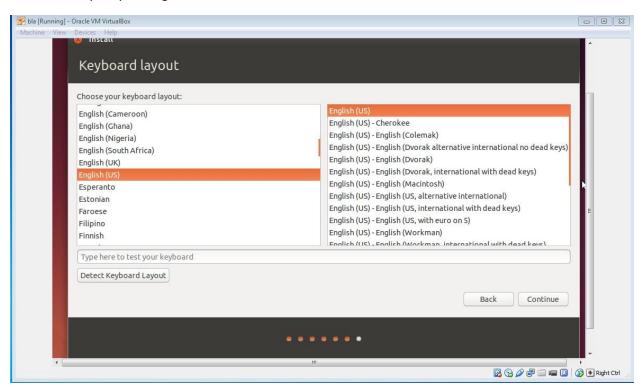

12. Kemudian klik 2 kalik free space lalu atur seperti digambar. Lalu klik install now.

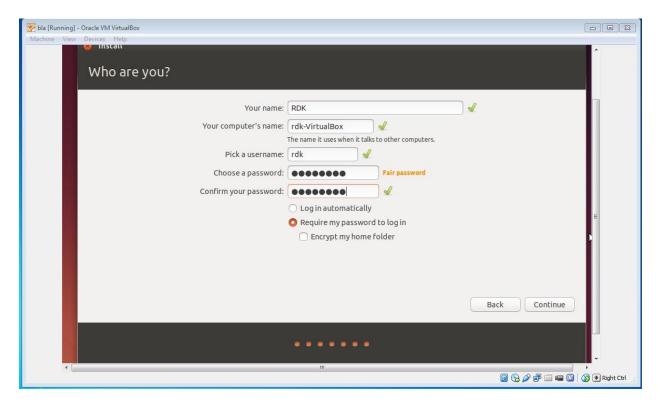

13. Sekarang pilih kota nya, kalau saya pilih dijakarta.

14. Pilih bahasanya seperti digambar.

15. Sekrang isi form nya sesuai, lalu klik continue.

16. Sekarang tunggu sampai proses instalasi selesai, bila sudah selesai Ubuntu siap digunakan.
