TUTORIAL INSTALL BACKBOX LINUX DENGAN VMWARE

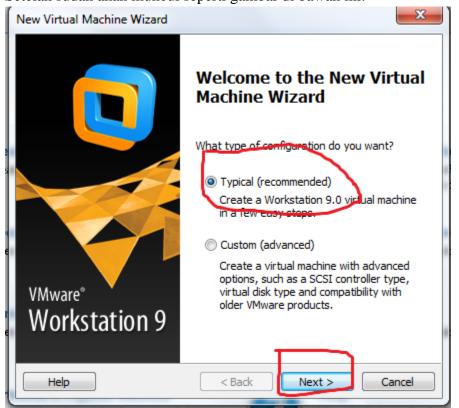

Nama: Muzammil Insani Al Farugi

NIM : 2015470048

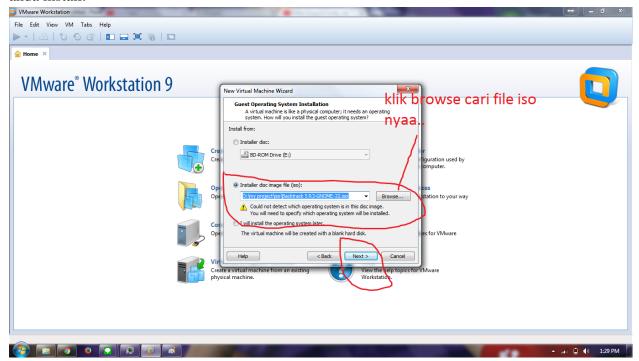

Pertama buka VMWARE anda lalu klik "Create a New Virtual Machine".

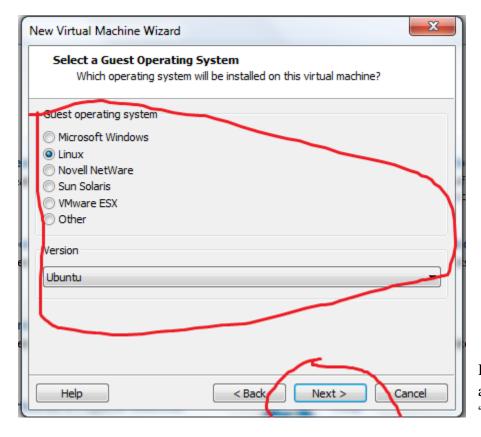

Setelah sudah akan muncul seperti gambar di bawah ini.

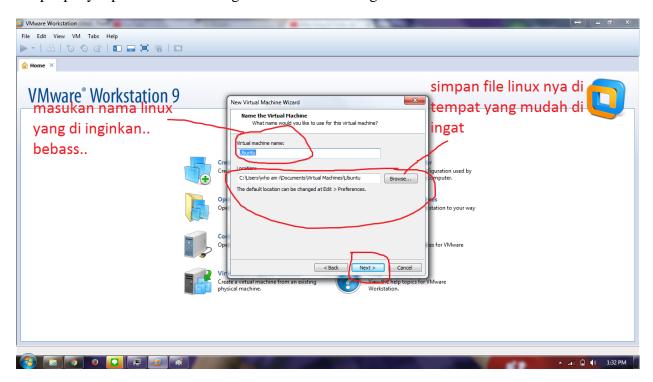

Lalu pilih seperti gambar diatas, jika sudah lalu klik "Browse" untuk mencari iso yang ingin anda install.

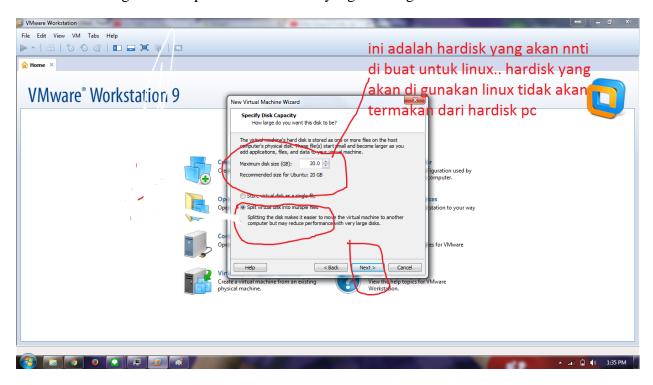

Pilih operating system nya Linux dan version Ubuntu.

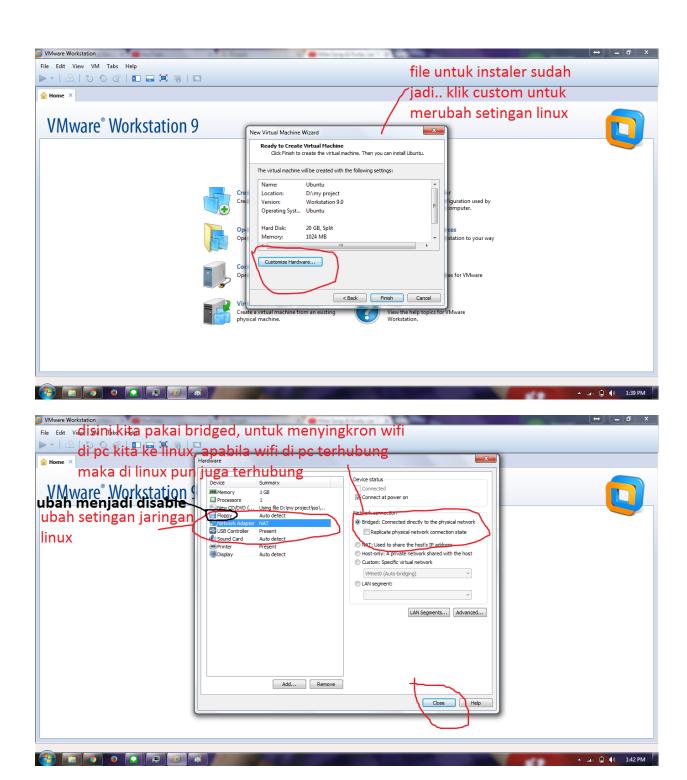

Buatlah name linux yang anda inginkan. Lalu klik "Browse" untuk mencari tempat penyimpanan linux anda agar mudah dicari/diingat.

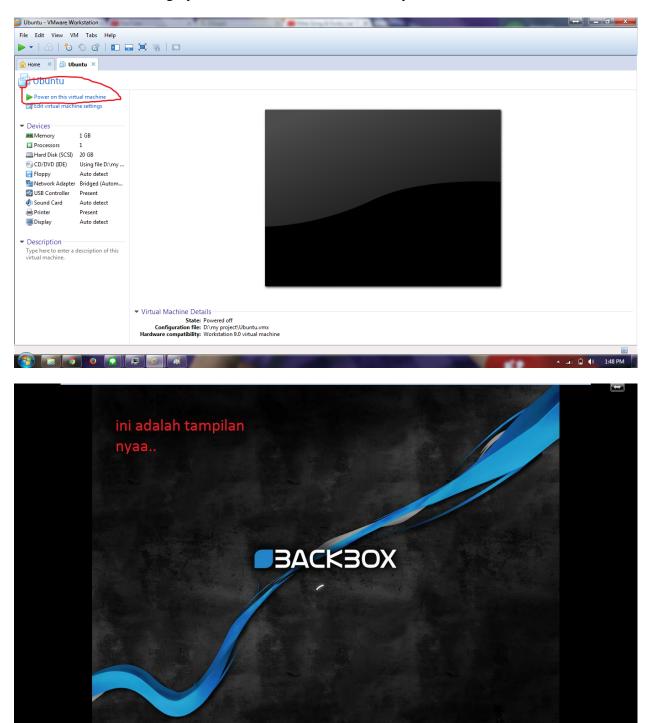

Setelah itu konfigurasikan space Hardisk Linux yang anda inginkan.

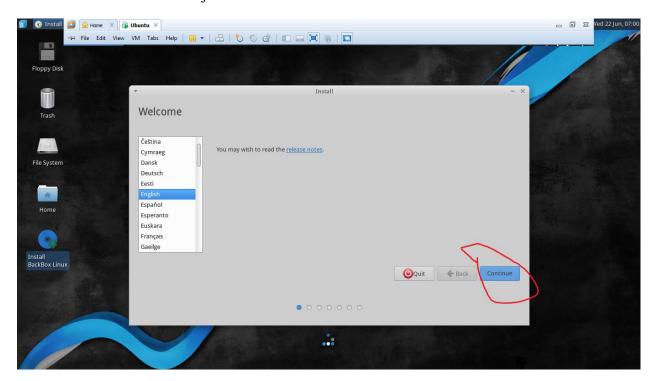

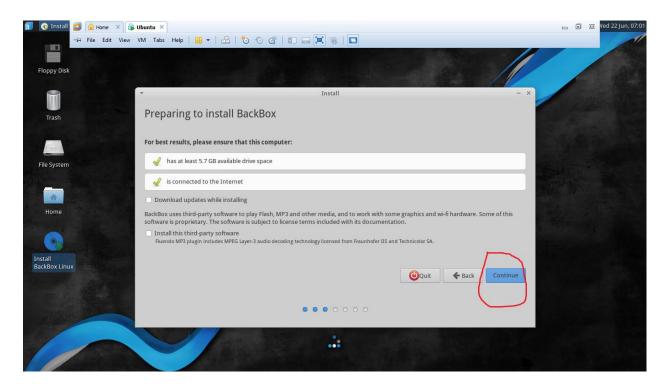

Jika sudah selesai setting nya, klik "Power on..." untuk menyalakan.

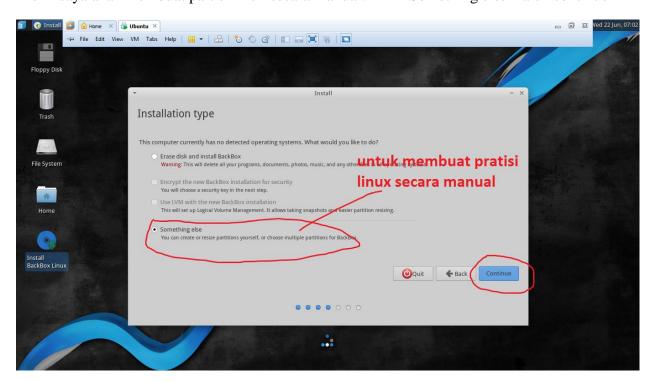

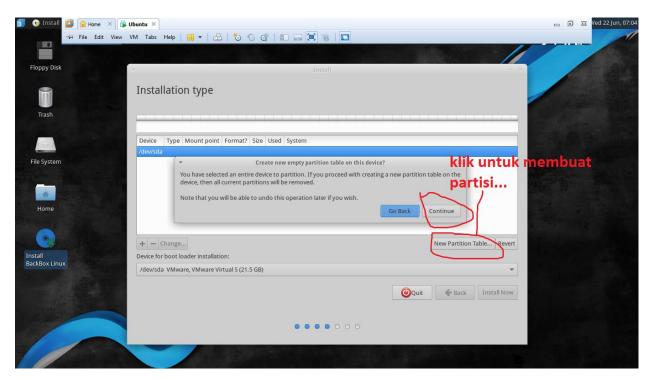

Klik "continue" untuk melanjutkan.

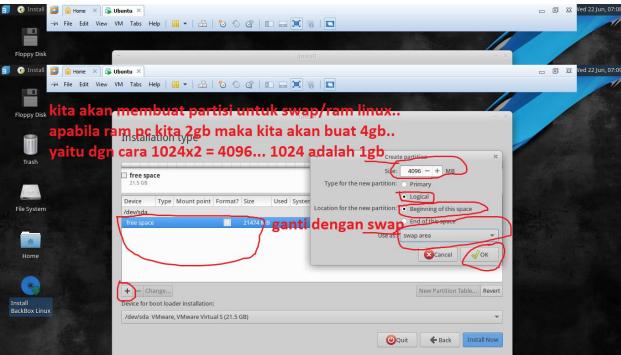

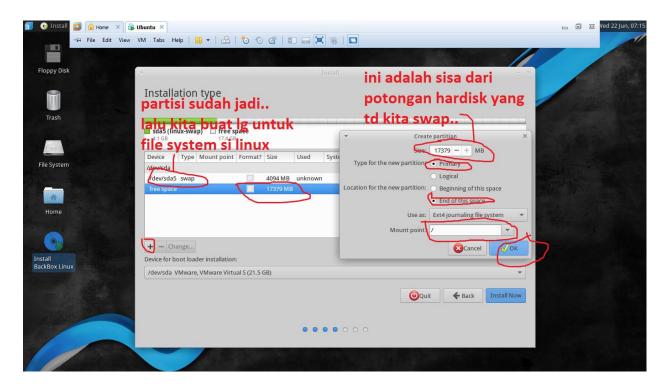

Disini saya akan membuat partisi linux secara manual. Klik "Something else" lalu "continue"

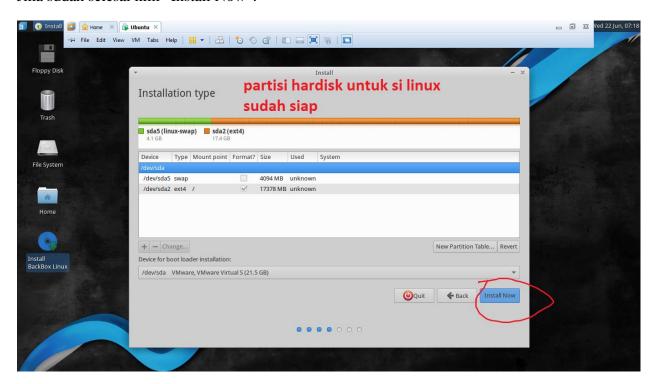

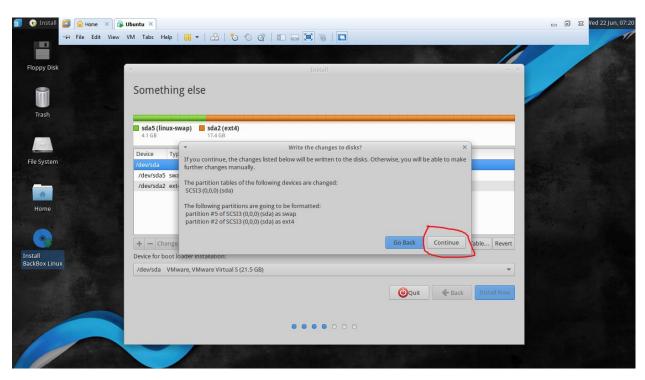

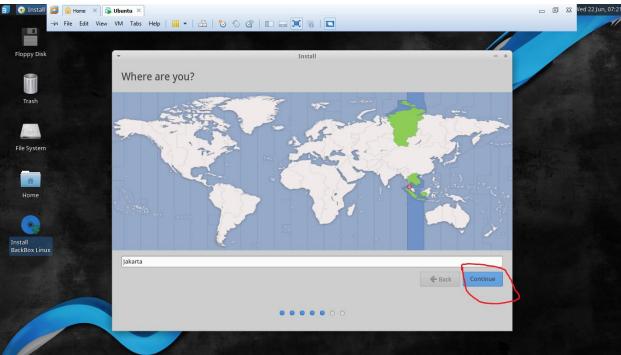

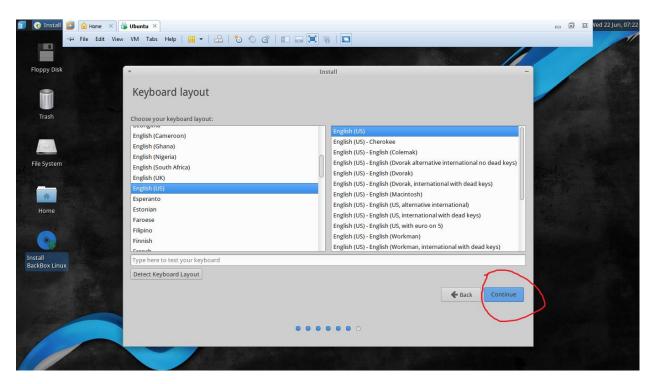

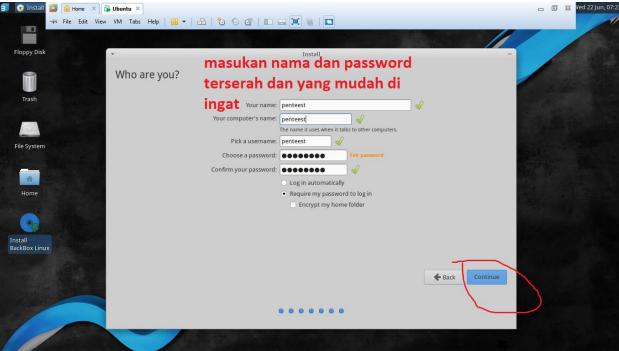

Jika sudah selesai klik "Install Now".

Tunggu hingga proses instalasi selesai. Jika sudah selesai maka linux siap di gunakan.
